Dear Hiring Manager,

I am writing in regards to the Cloud Engineer opening that I found on the company website. I am confident that I have the skills and qualifications that you are looking for and would be a valuable asset to your team. I have been working in cloud engineering for the past 3 years and have a deep understanding of AWS services in particular.

I hold an UCT BSc in Computer Science and Computer Engineering and an AWS Certified Solutions Architect Assosicate certificate with an exam score of 772. It took me a 3 weeks to study for the exam, I am a fast learner and I am able to work well under pressure. I am well-versed in a vast majority of AWS services. I previously worked at a start-up called NiceHealth in which I was in charge of hosting a static website on an S3 bucket.My responsibilites included architecting, building and maintaining cost-efficient, scalable cloud environments for the organization. I needed to understand business objectives of the company and create cloud-based solutions to facilitate those objectives.

I am a highly motivated and results-oriented individual who always puts the needs of the client first. I have a strong track record of success in meeting and exceeding client expectations. I am also a team player and am always willing to lend a helping hand when needed.

I would be grateful for the opportunity to discuss my qualifications with you in further detail. Thank you for your time and consideration.

Kind Regards,

Kagiso Kgwahla
